

## We'd love to hear from you, our newest Foodcyclers!

If you have any feedback to share or questions about using your new kitchen container, drop us an email at [recyclenw@wm.com](mailto:recyclenw@wm.com)!

## What are your fellow Foodcyclers Saying?

*"Since becoming a Foodcycler, I've learned that so much of the stuff I was throwing away can be composted. My weekly trash has gone way down!"*

*"I keep the little poster of what can and can't be composted. I've learned that there so many different things I can compost - more items than ever before."*

*"Before I got the Foodcycler container, I thought meat and dairy scraps couldn't go in a compost system."*

*"I'd never thought of putting dead flower arrangements or tea bags in before I got your guidelines. That was so helpful."*

*"It's way more convenient to have a Foodcycler container in the house. I buy compostable bags and empty the container once a week."*

*"We LOVE our Foodcycler container. I cannot believe how much garbage we save by using it - all the vegetables and meat scraps!"*

*"I have my shiny new compost container in use under the sink!"*

*"We're down to one bag a week of non-recyclable garbage and are hoping to reduce that by at least another third or even half. This container works!"*
