

Why Recycle?

Recycling turns materials that would otherwise become waste into valuable resources. In addition, it generates a host of environmental, financial, and social benefits. Materials like glass, metal, plastics, and paper are collected, separated and sent to facilities that can process them into new materials, products or other beneficial uses.

WM now offers a program for recycling household waste, including compact fluorescent lamps (CFLs), batteries, and some household electronics. Please visit www.ThinkGreenFromHome.com for more information.

Prohibited Items:

Food waste, diapers, human or animal waste, paints, thinners, wood stains, solvents, caustics, ammunition, explosives, batteries, pesticides, any other toxic or hazardous substance (containers or contents).

For food waste disposal please contact the Forest Grove Transfer Station at (503) 249-8078.

For questions about hazardous waste disposal and recycling, please contact Metro at (503) 234-3000.

HOURS OF OPERATION

6:00am- 4:00pm Monday through Friday
8:00am – 12:00pm Saturdays

OFFICE

8:00am- 4:00pm Monday through Friday

PAYMENT METHODS:

Cash, Business Checks (No Personal Checks), Visa, MasterCard & Debit Cards
W/Visa & MasterCard Logo

The Hillsboro Landfill/Tualatin Valley Waste Recovery Story

The Hillsboro Landfill is a 400-acre site located in Hillsboro, Oregon. The landfill is permitted to accept permitted, non-hazardous Special Waste. The landfill was first opened in the mid 1960s. Designed and operated under highly regulated and prescribed procedures, our landfill is engineered to protect surface and groundwater through state of the art environmental controls. We carefully maintain our site to ensure we meet or exceed all federal, state and local regulations.

Of the 400 acres the landfill possesses, 179 acres are designated for wetlands area. The wetlands area provides habitat for over one hundred bird species and mammals including deer, beaver, rabbits and many others. The wetlands provide storm water control for the facility and surrounding neighborhoods and have increased the flood control capacity of the Tualatin River. Hillsboro Landfill partners with the Jackson Bottom Wetlands to support local educational programs through tours, species counts, and financial support. Together, Waste Management's landfills provide over 26,000 acres of protected land for wildlife habitats. The Wildlife Habitat Council has certified 110 landfills, including the Hillsboro Landfill.

Tualatin Valley Waste Recovery (TVWR) is a Waste Management owned recycling company located on the landfill property. TVWR recycles more than 50,000 cubic yards of wood and yard debris per year, which is ground into hogged fuel and used at local paper mills for the production of power. Over 1,000 yards of concrete and 6,000 tons of glass each year are beneficially used during cell construction and site maintenance. By utilizing these recycled materials, the landfill saves the mining of thousands of yards of rock and gravel each year. Beginning in 2009, TVWR also began processing commercial/demolition debris to remove recyclable materials.
