

RECYCLING ALL STARS

Recycling Tote Bag Instructions

To help make recycling easier and more convenient, Waste Management has supplied free recycling tote bags for property managers to give to residents for storing and then transporting household recyclables to outdoor recycling containers.

Help keep recyclables out of the landfill by using the recycling tote bag to take recyclable items shown on this bag to your outdoor recycling containers. If you already have a recycling bin you are using in your kitchen, consider using the tote bag in your home office as an extra recycle bin.

How do I use this recycling tote bag?

Your new recycling tote bag is designed to fit under your kitchen sink or in another convenient location. Put in your recyclables, and when the bag is full, take your recycling tote bag to the building's recycling area and empty everything into the recycling container. There is a handle on the bottom of the recycling tote bag to make it easy to hold on to and shake out the recyclables!

The outdoor recycle containers should be clearly marked. If you are not sure where your building's recycle containers are located, speak with your property manager.

If I already have a system that works, do I have to use the recycling tote bag?

No. You do not have to use a recycling tote bag. If you don't need your recycling tote bag, please return it to your property manager so another resident can use it.

If the reusable tote bag gets damaged, where can I get a new one?

Please speak with your property manager.

Thank you for recycling!
